Hi, my name is Brad Tipton. I help people learn to learn how to set up their lives quickly and inexpensively in the Private.

In this book I will be showing you the 7 simple steps to Create and Launch your Private business.

By following these steps, you can have your business set up and ready to bring in revenue in as little as 7 days.

In general, you can expect to bring in anywhere from \$3,000.00 to \$10,000.00 extra revenue each month.

Of course, I cannot guarantee these results. You could make more, or you could make less depending on your level of drive, initiative and follow through.

A little about me...

My and I currently own and run several Private businesses. I am a former negotiator for Wells Fargo. I am a former licensed mortgage broker, and I am the former owner of a stock purchasing and selling company. So, I KNOW what I am talking about insofar as creating and running businesses, debt removal processes, Promissory Notes, Private Administrative Processes, legal documentation, stocks, CUSIPS, and banking.

Why do I share this information about my background? Simple, so you can know the information that I share is "insider" information that you cannot easily get anywhere else.

Please enjoy this book called ***"How to Create and Launch a PRIVATE business in 7 Simple Steps"***.

Also, please feel free to contact me with feedback, with questions, or if you want my assistance in helping you launch your own private business within the next 7 days. My contact information is Brad Tipton bradtipton@yahoo.com

How to Create and Launch a PRIVATE business in 7 Simple Steps

By Brad Tipton

What Is the Difference between a Public Business and a Private Business?

A Public Business:

A public business is oftentimes referred to as a “publicly held” company. Typically, a publicly held business issues shares of stock and is referred to as a “Stock company”. In a stock company the stock shares are made available to the public. The shares are traded on the open market through a stock exchange. A company is also considered as public if it discloses business and financial information to the public.

A Private Business:

A private company is a business whose shares of stock are **not** publicly traded on the open market but are held internally by one or a few individuals. Many private companies are closely held, meaning that only one or a few individuals hold the shares. A company is also considered as Private if it does not disclose business and financial information to the public.

What are the 7 Steps to Creating and Launching A Private Business?

There are 7 simple steps to Creating and Launching your Private business:

1. Create a Logo
2. Purchase a Domain Name & Build a website
3. Start Marketing via Facebook
4. Schedule Appointments to talk with clients/customers
5. Provide a Quote for your services
6. Fulfil the Service Your Customer/Client Ordered
7. Get Paid

***“How to Create and Launch a PRIVATE business in 7 Simple Steps”

Step 1: Create A Logo

Mistakenly, some think a logo is just an image, a picture. However, real business owners know that a logo is typically the very first point of contact your potential clients and customers will see about your business.

Your logo is a vital point of recognition for clients. Your logo is an important foundation for the branding of your business.

With that in mind, a well-designed logo is an easy way to convey to potential customers that your business provides quality goods and services, is trustworthy, and is professional.

Back in the day, logos tended to be outrageous and contained the company's name, a slogan, images, and multiple colors.

However, today it's very common for a logo to contain nothing but an image. For example, the huge company called TARGET uses just red circles and a bullseye on a plain white background. But the logo is distinctive and powerful.

*** NOTE ***

TARGET is a huge company, so they do not need to put their name on their logo.

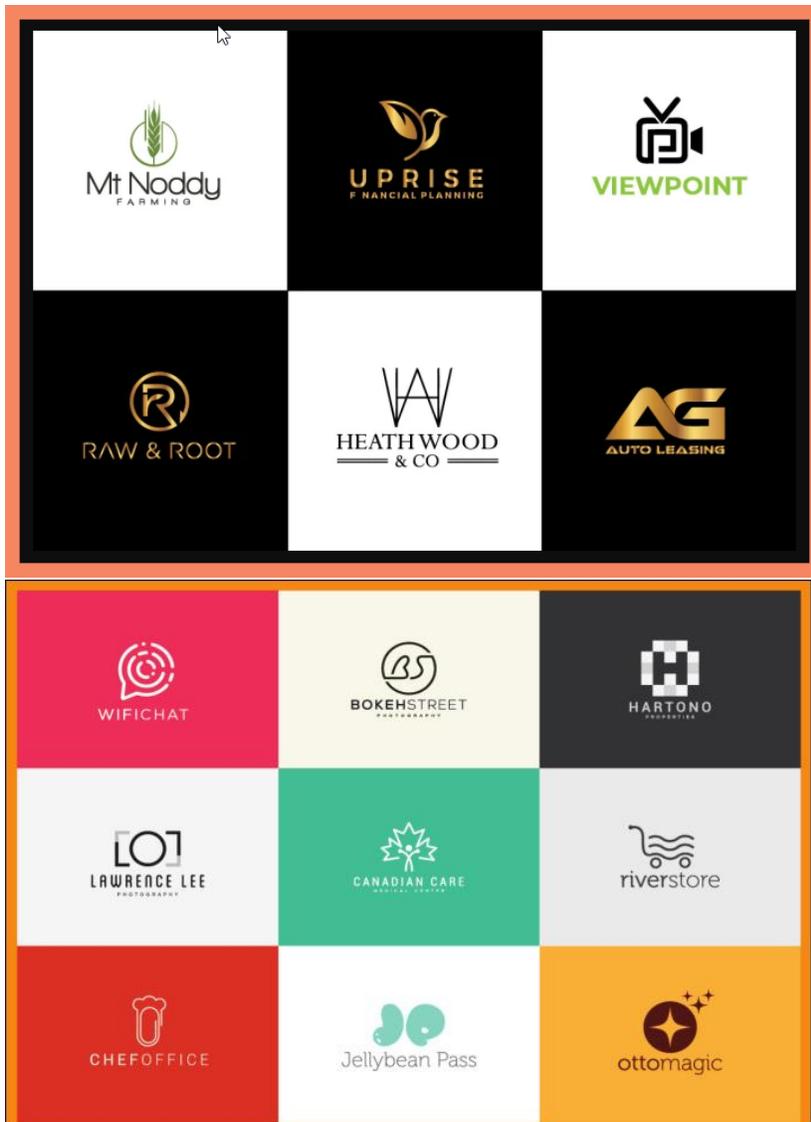

However, I suggest you put your business name and image on your logo.

A decent high-quality logo will typically cost you between \$300 and \$700 dollars

With that in mind, do all you can to keep your logo design simple. Here are some samples of the logos my team has created for clients:

click [HERE](#) Or email: bradtipton@yahoo.com

Step 2: Purchase A Domain Name & Hosting, then Build A Website

What is a Domain Name Hosting, and Website?

You may be wondering: what is a domain name and how do they work? As a potential business owner, you may have heard that you need a domain to make a website.

*"How to Create and Launch a PRIVATE business in 7 Simple Steps"
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com*

However, many new business owners confuse domain name with a website or website hosting service. If you are just starting out, then all these different terms may sound too technical.

So, let me explain it in a simple way:

In the regular world most of us know of businesses that exist. For example, there may be a locksmith business in your neighborhood.

In the regular 3-dimensional world, the locksmith's business is in a building. The building sits on a piece of earth (plot of land) on Main Street. The building has an address that sticks on the front of the business. For example, the locksmith's address could be 1313 Mockingbird Lane).

Well here's how it works in cyber world:

- Your website is the "building"
- Your hosting is the "plot of land" where your website "sits"
- Your domain (for example www.YourPrivateBusiness.com) is the address.

Where To Purchase A Domain and Hosting?

A great place to get your Domain and Hosting is an online company called GoDaddy or Hostgator. I have used them for almost 10 years, and they are excellent.

Where To Get a Website Designer?

For your website, you can typically find a decent website designer to create your website and then properly connect it to your domain and hosting.

For a solid mobile-friendly website, you'll typically need to invest between \$1,000.00 and \$2,500.00

Also, expect to pay about \$100.00 per month for the website designer to maintain your website to ensure it stays compliant with all the new cyber rules and regulations that seem to come out almost daily.

Three Reasons Why Your Business MUST Have a Website

First: That's how customers and clients will know you exist.

Back in the old days, people would use the Yellow Pages to find a business to provide the services they needed.

That's not how it works in this Twenty-First century. These days, if a customer needs a product or service, they "Google" it on their desktop, laptop, or on their mobile device.

For example, if a customer needs a locksmith, or a massage therapist, or a plumber, or a nail salon, or transmission work done on their car, they will simply Google it.

But without a website, your business CAN'T show up online! In other words, if you do not have a website to give you a web presence, then your business is basically INVISIBLE. Nobody knows about you. Nobody can find you.

So, it is VITAL to have a website for your business so you can SHOW UP and BE SEEN online, so customers and clients can "find" you when they are in the market and searching online for the kind of service your business provides.

Second: That's how customers and clients will know what services you offer

Once a potential customer or client finds your business online, they will click on your website to see what products or services you offer.

Typically, they will scan your website to see if it looks professional and trustworthy.

If your business looks professional and trustworthy, then they will stick around and search your website to see exactly what services you offer.

If they see that you offer what they need and if they believe you are trustworthy and professional, then they will likely click the "Call Us" button or the "Schedule An Appointment" button to schedule a time to talk with you or have you call them back to discuss their needs.

Third: That's how customers and clients can access your eCommerce and PAY you.

Once you have discussed the customer's needs and fulfilled or provided service to them, then your customer or client will need a Secure and Trustworthy way to pay you for your services.

That's where eCommerce comes in. Ecommerce is nothing more than you giving your customers or clients a safe electronic way to pay you for the service you provide to them.

On your website it's important to give your customer or client the ability to pay you with their Visa, Master Card, Discover, or their American Express.

Your website makes it simple, easy, and safe for your customers and clients to pay you and have the cash go directly into your account.

Step 3: Start Marketing Your Business on Facebook

What is Facebook Marketing?

Facebook marketing is a platform that offers a variety of highly targeted paid advertisements and posts. With paid advertising and posts, you can quickly, easily, and efficiently put your product or service directly in front of the massive audience who are most likely needing exactly what you are selling.

Facebook's Targeting is the Key!

For example, when you see a T.V. commercial it may or may not appeal to your needs. For example, I see T.V. Ads all the time for diapers. But my youngest child is 30 years old. So, I have no need to see diaper ads. But with T.V. Ads you cannot target. So, businesses waste time and money putting their ads in front of many people who have no need for their product or service.

Facebook is NOT like that. Facebook knows so much about those who are on Facebook. It's like people put their whole lives on Facebook. So, Facebook knows if you have children. They know how many children you have. They know their birthdates. Facebook also knows if you are married or single, employed or unemployed. They know your race. They know your gender. They know your

"How to Create and Launch a PRIVATE business in 7 Simple Steps"
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com

education level. They know if you are likely gay, or straight. They know where you shop. They know your income level. They know who your friends are. They know who your family is. They know if you are separated, or divorced, or married. They know if you are at home or if you are on vacation. They know your political preferences. They know if you are a vegetarian or not. They know your music and movie tastes. In short, they know so much about each and everyone who uses the Facebook platform.

As a business owner, that means Facebook can use their Artificial Intelligence and put your ads directly in front of those who are most likely to need exactly what you sell.

So, on Facebook, they know my children are all grown. So, unlike my T.V. commercial example above, there is no way Facebook will put a diaper ad in front of me. Instead, Facebook will put diaper ads ONLY in front of people who are parents or grandparents of children who are of diaper-wearing age.

So I highly recommend that you run Facebook ads and let Facebook use their Artificial Intelligence to send you truckloads of customer and clients who are most likely to need the exact products or services you offer.

How Much Does Facebook Marketing Cost?

As you run your business, it is important to get away from asking how much something costs.

For business owners all they care about is R.O.I. (Return On Investment).

R.O.I. just means if a business owner invests a dollar, how many dollars will he or she get back. And if the investment makes sense, then the business owner will make the investment every time.

For example, I encourage you to invest about \$5.00 per day in Facebook ads. That means in seven days you will invest about \$35.00 dollars.

But if you land just one client or customer and you earn \$35.00, that means your Facebook marketing was free! You invested \$35 and the return on your investment was \$35.00

So, my advice is when you price your product or service, please be sure that you create enough profit to cover your \$35 per week Facebook investment.

"How to Create and Launch a PRIVATE business in 7 Simple Steps"
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com

NOTE

Marketing on Facebook is NOT simple. It is NOT easy. And if you do not know what you are doing, it is likely that you will invest in ads and get ZERO back.

So be sure to hire a Facebook Ads Manager. The Facebook ads manager will create your ads, make sure they are getting in front of the proper audience, and the Facebook Ads manager will keep a close watch on your R.O.I. to ensure you are making money and NOT losing money on Facebook.

[How Much Does A Facebook Ads Manager Cost?](#)

Remember? As a business owner the key is R.O.I. not cost. A good Facebook Ads manager will run you about \$500 per month. And remember you will still need to pay Facebook \$5.00 per day.

So, be sure to price your product or service so that you cover all your marketing costs AND make a handsome profit for yourself.

Step 4: Schedule Appointments

On your website be sure to provide a link so potential customers and clients can schedule a time to talk with you about their needs.

Your website designer will be able to add the appropriate link on your website that says, “**Click Here To Schedule An Appointment**”.

There are scheduling services online where you can create link to give your customers the ability to see your calendar and schedule an appointment to talk with you. You have 100% control over the days and times when customers can schedule time with you. You also have 100% control over how long the call can be: 15-min, 30-min, 45-min, 60-min, or more. It's all 100% up to you.

But I highly recommend on your website that you give potential clients the ability to schedule time with you. By doing this, you will come across as approachable easy to contact, and easy to deal with. These are all crucial in business.

A scheduling service will typically run about \$30 per month (\$7.00 per week). So make sure you price your product or service to cover the cost of your scheduling service.

*“How to Create and Launch a PRIVATE business in 7 Simple Steps”
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com*

There are two scheduling services I recommend:

- Calendly (which is the one I currently use)
- Schedule Once (which is what I have used in the past)

Both are excellent.

Step 5: Quote

Once you know your monthly costs for your website, your hosting, your website maintenance, your Facebook advertising, your Facebook ads management, and for your scheduling service, then you will know how much to quote for your product or service and still make a good profit.

So, when you speak with your potential clients or customers, be sure to get their email address. Why? So, that you can easily email them a written quote for your product or service.

So much of doing business these days is about looking professional. By providing a written quote via email that has your logo on the quote, that makes you stand out above the rest. It makes you come across as reliable, professional, and trustworthy.

So always be open to providing a professional written quote via email to all your potential clients or customers.

PayPal has an excellent free service that allows you to email a quote at the click of a button.

Step 6: Fulfilment

What is Fulfilment in Business?

In business **fulfillment** is defined as the steps you take for your customer or client to receive your product or service. Fulfillment is the part of the process where you provide or deliver your product or service to you customer or client.

Doing what you say and providing what you promised is crucial in business.

Fulfilment is where the product or service is delivered or provided to your customer or client. Once the customer is satisfied, you get paid.

*“How to Create and Launch a PRIVATE business in 7 Simple Steps”
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com*

Step 7: Getting Paid

Some may think this sounds terrible. But if it sounds terrible, it means there is no real understanding about what business truly is all about.

So, let me say it...

In business, getting paid is what it is all about.

Getting paid is the POINT OF IT ALL.

But getting paid is simply the end result of you providing real value to some other man or woman on the planet.

In a proper business transaction, the buyer is happy because he or she satisfied that which he or she was lacking.

And also, the business owner is happy because he or she got paid handsomely for providing a product or service that satisfies their customer or client.

For example, I paid Walmart of the Hewlett Packard laptop I am using the write this book.

I have used this laptop to create logos for my businesses, build my website and over 1,000 websites for others. I have used this laptop to write hundreds of ads and make thousands and thousands of dollars in business.

So, the question is “Who won” when I bought this laptop from Walmart? Did I win or did Walmart win?

We both won! That’s how business works. Both parties are happy. Both parties win!

How Do You Get Paid In The Private?

If you are going to run a successful business in the Private, you must get familiar with a term called [Peer-To-Peer Transactions](#).

What Are Peer-To-Peer Transactions?

Peer-to-peer transactions (also referred to as person-to-person transactions, P2P transactions, or P2P payments) are electronic money transfers made from one person to another through a 3rd party (like Cash App or Venmo).

*“How to Create and Launch a PRIVATE business in 7 Simple Steps”
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com*

By using Peer-To-Peer Transactions, you keep your business Private. Is it no one's business but yours and your client's.

Peer-To-Peer Transactions are typically sent and received via mobile device or any home computer with access to the Internet, offering a convenient alternative to traditional payment methods that are required to report your financial business to others like the government, the IRS, or other third parties.

For years I used PayPal for all my eCommerce business needs. However, PayPal is now under order from the IRS to report if you make over a certain amount of money.

If you are going to live successfully in the Private, it is important to keep your financial records to yourself.

To keep your business revenue Private, I suggest using either or BOTH of these Peer-To-Peer providers:

- CashApp
- Venmo

I especially enjoy Venmo because on their website they have a special section on their website called "**Venmo For Business**".

You can simply click that section and set up your business to receive payment from anyone who has a debit or credit card.

HERE'S YOUR NEXT STEP

Take the advice provided in this book and USE IT!

Don't just let it sit around.

Take Action! Get started and DO the things I suggested. There is no reason you cannot have your business up and running within the next 7 days.

If done properly, within the next 30 days you should be averaging an extra \$1,000.00 per month.

By the end of 60 days, you should be averaging an extra \$1,000.00 to \$3,000.00 per month.

"How to Create and Launch a PRIVATE business in 7 Simple Steps"
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com

But the end of 90 days, there's no reason you cannot be receiving an extra \$3,000.00 to \$10,000.00 per month

WHAT IF YOU ARE SCARED or UNSURE?

If you are scared or unsure...that is a normal feeling when you are new to something.

If you want to launch your business in the next 7 days but you feel unsure, then here's my suggestion...

Get a business coach.

I would be honored to be your Business Coach.

You can use all my years of experience and advise to ensure you do everything correctly to run your business 100% in the **Private**.

If you are feeling a little scared, nervous or unsure, simply Contact me and let me set up the ENTIRE thing for you.

I have an entire TEAM in place who will do the following:

1. Create your Logo
2. Purchase you a Domain Name & Build your website
3. Run and Manager your Marketing via Facebook
4. Set Up your Scheduling service so all you have to do is talk to clients/customers
5. Provide you with the electronic quote system that has your logo on it so you can Quote for your services via email
6. Monitor your fulfilment and set up all the electronic follow-up between you and your customers to ensure they are satisfied with your Fulfillment
7. Set up the Peer-To-Peer business systems to ensure you Get Paid

Simply click [HERE](#) to schedule a time to talk with me as I can create all the parts for your business and launch in within 7 days for a fraction of the costs:
<https://calendly.com/bradtipton/free-coaching-call>

*"How to Create and Launch a PRIVATE business in 7 Simple Steps"
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com*

CONCLUSION

If you are going to live your life in the Private you MUST understand and grasp that one of the main skills you must cultivate is the ability to Create Cash for you and your family.

If you are going to live successfully in the Private, you cannot continue to lean on and trust the public “matrix” to do anything for you.

Why? Their role is to make you a SLAVE and keep you a SLAVE and take all your money in Social Security, IRS Taxes, State Taxes, and then Tax you whenever you make a purchase of shoes, or gasoline, or anything else.

It is NOT the Public Matrix’s role to free you. It is their role to enslave you.

The hard and unfortunate truth is..

Nobody is coming to “save” you. Why? Because that’s YOUR role.

So now is your time to Wake Up, To Rise Up, To Step Up, and to TAKE ACTION to free yourself.

I get it. I know there is a lot to creating and launching your business. But if you take the steps and get a coach, you can begin to create a level of income and generational wealth that your current job can never provide.

So, if you are happy and excited to get started...

Or if you are feeling a little nervous and scared...

Contact me and let’s talk. Let me answer your questions. Then use the information above to TAKE ACTION and...

Next year at this exact time, your income could easily be over \$100,000.00 because you pressed past the doubt, the fear, and the anxiety that the Public Matrix wants you to have...

*“How to Create and Launch a PRIVATE business in 7 Simple Steps”
By Brad Tipton. To Schedule A Free Coaching Call with Brad
click [HERE](#) Or email: bradtipton@yahoo.com*

But when you press past, there is joy, freedom, and financial peace and security that you have only dreamed of.

So, feel free to contact me and here's what will happen when we talk:

1. I will listen to your vision.
2. I will gain clarity about the Obstacles, Doubts or Fears
3. I will provide you with a free written Path & Plan to achieve your vision.

Until then...All the very best to you in your journey to live Successfully in the Private.

All the best to you in your journey to live in the Private.

Simply click [HERE](#) to schedule a time to talk with me as I can create all the parts for your business and launch in within 7 days for a fraction of the costs:
